CAREER SUMMARY

Results-oriented Full-Stack Developer with over 3 years of experience developing production-ready applications visible on GitHub and live servers. Focused in architecting scalable web platforms using modern tech stacks and integrating AI-driven features to enhance user engagement and automation. Focused on model optimization and secure authentication logic, with a dedicated focus on delivering premium, high-performance digital products from the ground up.

PROFESSIONAL EXPERIENCE

Jun 2025 – Aug 2025

Adama City Administration

Frontend web developer | Adama

- **Smart Inventory Management System** — Designed and developed a responsive inventory management platform for tracking products, stock levels, and warehouse data, using (react, node.js, Express.js, Prisma etc).
- **Optimized Performance:** Improved system efficiency by automating manual inventory tracking processes.

General Technical Background Experience

Full-Stack Systems: Engineered 5+ repositories, including AI academic assistant and ATM Simulation

Technical Breadth: Built diverse solutions ranging from Real-Time Facial Recognition to high-performance e-commerce.

Modern Stack: Expertly utilized Next.js 16, PHP Laravel, Node.js, and MySQL for secure, scalable products.

AI & Automation: Worked in automating enterprise workflows and integrating AI-driven features (Whisper/NLLB-200)

Education

May 2023 – Jun
2026

Bachelor of Science in Computer Science
At Haramaya University

Skills

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, PHP, REST APIs

Other Tools: Git, Github

Database: MongoDB (with Mongoose) MySQL (SQL)

RELEVANT PROJECT

AI-Powered Academic Assistant for Visually Impaired Students

Purpose & solution: Built an AI-powered academic platform with voice interaction and multilingual support for visually impaired students. Integrated speech recognition, AI-powered Q&A, secure authentication, and REST APIs.

.Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, OpenAI API, Whisper, Tailwind CSS.

ATM Machine Simulation System

Purpose & solution: Developed a banking system simulation that replicates ATM operations for learning and demonstrating core banking functionality. Supported deposits, withdrawals, balance inquiries, and fund transfers.

Tech Stack: HTML, CSS, JAVA and JavaScript

Smart Inventory Management System

Purpose & Solution: Designed and developed a web-based inventory management system to automate stock management, reduce manual errors, and improve operational efficiency.

Tech Stack: React.js, Node.js, Express.js, Prisma ORM and MySQL
